

Submittal Data Sheet

Features:

Alarm trim plates are designed to allow a smaller conversion alarm than otherwise needed to cover an opening left by the original larger alarm. This allows for fewer futures and blank future slots in an alarm that may not be needed.

- Three standard sizes stocked for quick shipment
- For 2 and 3 slot conversion alarm only
- Available for 5 slot alarms as a custom order
- Available in other sizes as a custom order
- Made with 3/16" thick ABS Haircell material
- Textured to prevent fingerprints
- Beveled edges for a finished look
- Available in White

Any other sizes other than the stocked sizes are considered "special" or "custom". Follow the matrix to order and we will assign pricing on an individual basis depending on your special need.

Stocked part numbers:
